Bob,

Please find the initial feedback I received from WEGO's Chinese Producer.

Please review and forward any further questions you might have.

Dear Greg, my China office just responded to the following questions as follows. Please let me know if you need anything else.

Best Regards,  
Frank Abramson

Dear Frank,

Thanks for your email.

Please see below reply after checking with Hunan Guangcheng:

for the question, we answer as following:

2), The factory locates in Hengyang City, Hunan, producing Sodium Fluoride from Sodium Silicofluoride and Soda ash; their SF is not a byproduct of Al or other industry.

3), the material SSF is a product from P fertilizer producer;

4), Traceability: They product is traceable as per ISO 9001, The material purchased are sampled and tested with proper documentation, all the product in single package is marked with serial number corresponding to relative testing documents.

Greg,

Thanks for you prompt response. The more detailed the response the better as we need to answer questions on this particular product to the public

Thanks,

Bob Tozeski

Bob,

I am working on your request, and yes WEGO out of New York State is our supplier.

I have forwarded your questions to my contact at WEGO, and will forward their response to your questions as soon as I receive them.

I will be your direct Lincoln Fine Ingredients contact going forward, and my cell number is below if you would like to call.

Thank you for your inquiry.

Best regards,

Jim,

Good Morning. I did leave a message earlier with your office regarding source and supply information for sodium fluoride being supplied under the NEMVCC bid. We will be purchasing NaF for our new treatment facility located in the Town of Shrewsbury starting later this summer into early fall. Since no bids were received for domestic supply only foreign origin, I am requested the following information on behalf of the Town of Shrewsbury Ma :

- 1) Please confirm if the product is being supplied by WEGO out of New York State
- 2) If China is the country of origin, please indicate where the source is located and what type of plant is supplying the product ( For example is the plant an aluminum or fertilizer manufacturing plant)
- 3) Can the process of how the chemical is manufactured be documented and forwarded. Is it from a mining source or a byproduct of another manufacturing process

4) Please clarify NaF traceability from source mine/plant to your firm and the companies involved

Many questions have been raised from ourselves and within the community regarding product source and supply. Our present facility has been using hydrofluosilicic acid as a fluoride supply. We would like to have these concerns addressed directly to clarify this situation. Thank you in advance for your help in this most important matter.

Regards,

Bob Tozeski
