Kevin,

I have attached the manifests for the chemicals removed from the plant. HSAF is only one the chemicals removed. We have 100 gallons of ethylene glycol from the radiator of the emergency natural gas generator, 1150 gallons of hydroxide and 100 gallons of fluoride and there should be one more for liquid polyphosphate. They go to Enpro Services, Williston, Vt for processing. The cost is part of the overall treatment plant construction bid price.

Bob

Attached are the slips of what we took out of un-sued chemicals from the old Treatment plant. I don't have the actual cost yet as we have not received the bill but can get that over once we receive it.

Thanks

Mike

Mike,

Here are copies of all the manifests that were taken offsite.
